-VII CHENTENTIN-

Mew, Rare and Beautiful Plants

New and Rare Plants.

*Spiraea(Anthony Waterer.

This is a sport from the well-known Spiraa bumalda, from which it differs only in color, the flowers being a rich crimson, borne in large corymbs thickly on the plant. It is a continuous bloomer, and is, without doubt, the most important addition to hardy flowering plants of many years. 30 cts. each, \$3 per doz.

"This is star plant. We have a bed of it at Kew, and it attracts everybody's attention, the flowers being a rich crimson color, in large corymbs and borne thickly on the plants, which, although not exceeding a foot in height, have flowered freely and continuously since the beginning of summer. Mr. Waterer says it is as good in its way as a bedding geranium, and some people would say it is better."—W. Watson.

(Impatiens auricoma.

A beautiful golden Balsam. Flowers abundantly on upright peduncles; a rich yellow, which forms a pleasing contrast with the dark hues of its ornamental foliage. It is a remarkably handsome plant. 75 cts. Ready in April.

*Strobilanthes Dyerianus.

(Introduced by F. Sander & Co.)

This plant will undoubtedly become universally popular, on account of its brilliant and exquisite coloring, its extraordinarily easy growth and usefulness as a decorative plant. It surpasses the finest coleus, begonias or bertolonias in the exquisite coloring of the leaves, besides which the long racemes of lovely violet blossoms with which the plant is covered in mid-winter greatly enhance its value, beauty and usefulness. The undulation on the surface of the foliage is furnished with a bluish metallic hue, shading into light rose, with a light green margin. It will prove a valuable acquisition, both as a bedding and decorative plant. 25 cts. each, \$1.50 per doz., \$8 per 100; after May 1, \$6 per 100.

The Florists' Exchange says: "This promises to become a very valuable addition to the list of bed-Ine Fiorists Exchange says: "Inis promises to become a very valuable addition to the list of bedding plants for this country. It has been tested this season, both at John Saul's nurseries and at the White House gardens. Mr. Saul has some plants of it growing splendidly in a very exposed position, where it gets the full sun from morning till evening. In general appearance the plant, owing to its colored foliage, is suggestive of some of the bertolonias."

*Tecoma Smithii.

STROBILANTHBS DYERIANUS.

A hybrid raised in Australia a few years ago from *T. Capensis* and *T. velutina*, the latter a variety of *T. stans*. It is a first-rate greenhouse plant, and would be a glorious climber for verandas in countries where it could be grown out of doors. At Kew it is grown on the dwarfing system, which results in plants scarcely two feet high, bearing large, terminal heads of the most delightfully attractive yellow flowers. It is a plant for the million. 50 cts.

*Calamus ciliaris.

This is quite a gem amongst small-growing Palms. The stem is erect and slender, leaves pinnate, clothed with a quantity of soft hairs. The bright, light green color of the leaves, to-gether with their feathery-like appearance, renders it a useful and most graceful plant.

*Rhapis humilis.

Dwarfer in growth than flabelliformis, yery useful Palm. \$2.50.

New Diplademia, atropurpurea.

This is a companion plant for the delicate D. Bolissensis. It produces large trusses of bloom of 15 to 18 flowers; before opening they are of a bright crimson, but when the petals are unfolded, are of a bright, deep, velvety maroon the color is rich and charming.

*Smilax Argyrea.

This charming novelty obtained a First-class Certificate at the Royal Horticultural

BOUGANVILLEA GLABRA SANDERIANA.

Society. As regards elegance of habit and color, it is one of the most beautiful plants lately introduced. The leaves are long, having a very short foot-stalk, oval, with the very pronounced ribs of a beautiful bright green, and irregularly streaked with silvery white; they sometimes measure as much as 15 centimeters in length and about \$\mu\$; in width. This Smilax is worthy of being classed among the most charming creepers with striped foliage known, and is one of the hardiest.

*Lycoris aurea.

"This very beautiful plant is now in flower, and a perfect picture, the stout scapes, a foot or more long, each bearing a large nmble of flowers like Nerines, but very much larger than the largest, and the color deep yellow, with a luster like a new English sovereign. This is the handsomest bulb in flower with us now."—II. Watson. \$1 each.

√ *Bougainvillea glabra Sanderiana.

A plant of the most easy culture, producing its magnificent rosy crimson bracts and yellow blossoms in the smallest pots, under all conditions, in the greatest abundance and amazing profusion. 50 cts.

*Rodgersia podophylla.

A very beautiful foliage plant. There are few hardy, or for that matter, tender plants, to beat it. It is easily grown; quite hardy. \$1.

*Echites Andrewsii.

A beautiful climbing plant; as showy as an allamanda; large, yellow flowers. 40 cts.

Clematis.

*CLEMATIS STANLEYANA. A very distinct species from South Africa. "Other exhibits from Kew were *Clematis Stanleyana*, which is a really pleasing plant when planted

in a sunny border in rich soil and treated like Anemone Japonica. its elegant silvery foliage, numerous rose purple nodding flowers and ornamental fruits being effective towards the end of summer. 50 cts.

*CLEMATIS EDOUARD ANDRE. A very distinct new Clematis; bright, velvety red; very effective and free. 50 cts.

*Veronica Reine des Blanches.

Dwarf, bushy habit; flowers pure white; free. 50 cts.

Yellow Ipomoea, or Yellow Morning Glory.

A very distinct Mexican plant. Succeeds well in the open air during summer. 50 cts.

Saxifraga sarmentosa tricolor superba.

A very beautiful, variegated plant. 50 cts.

VERONICA REINE DES BLANCHES.

*Vitis Coignetiae.

"In the forest of Yezo, V. Coignetiæ climbs into the tops of the tallest trees, filling them with enormous leaves, which in autumn assume the most brilliant hues of scarlet." Ready in May. \$1.

*Ligustrum Ibota.

"The long, slender, arching branches give to it a light and graceful habit in marked contrast with that of the other species of this genus, which are usually stiff and rigid. Late in the month of June, from the end of short lateral branches the clusters of white flowers hang in great profusion, giving to the plant a charming effect of grace and lightness." 25 cts.

Rare Magnolias.

*HYPOLEUCA. Wm. Goldring says in the Garden; "This Magnolia was unques-

SYRINGA, or LILAC.

Magnolia was unquestionable the finest tree I saw in Japan, when there during all the flowering month of May last." It is a large-leaved, large-blossomed, tall tree of the Hakone mountains, and hardy and a capital grower here. Last summer a specimen at Dosoris had 72 flowers open at one time." Small plants, \$1.

*PARVIFLORA.
The flowers are pure white, ovate to round in the bud, opening round and expanding to saucer-shape; 3½ to 4 inches across. \$1.50 to \$2.50.

*WATSONI. Cream color, stamens crimson; the strongest-scented of all hardy Magnolias. \$2.50.

*Betula Maximowicziaŋa.

One of the handsomest trees in Japan, and one of the most distinct and beautiful of birches; 80 to 90 feet high.—Sargent. \$1.

New Syringas.

*CLAUDE DE

LOBRAINE. Very large spikes of flowers; claret color, turning to violet. 50 cts.

*MME. LEMOINE. Spikes compact, 10 inches in length; flowers large and double, of the purest white; a beautiful variety. 50 cts.

*SOUVENIR DE L. SPATH. The finest of the sorts; the flowers are large, and of a bright scarlet color, not only in bud, but also when flowers are completely open. 50 cts.

*Asonthoponax ricinifolia.

Extremely beautiful; foliage similar to an aralia; nearly or quite hardy. \$1.

Anthemis tinctoria Kelwigii.

Flowers a rich shade of orange-yellow; good form, with good cutting stems; the plant has a gorgeous effect, with bloom from early in the summer until frost. 20 cts.

Geraniums.

DOUBLE GERANIUM.

NEW ZONALE (SINGLE) GERANIUMS.

Fred. Kanst. One of the grandest of the scarlet bedders; has stood the sun and was a mass of color during our exceptionally hot summer of '93; a fine bedding variety.

Hoosier. Petals overlapping, and floret slightly cupped; truss large; brilliant rosy scarlet a bedder of the highest order. 10c.
bord Roseberry. Flowers quite round. of a bright scarlet, beautifully shaded with rich crimson; petals of great substance, broad and overlapping. 10 cts.

Lady Brooke. Color white, with delicate pink mark in center; very striking: trusses of fine size. 10 cts.

Mine. Wastons. 10 cts.

Rex. H. Harries. Soft, rosy red, producing perfectly circular florets, forming trusses of immense size. 10 cts.

St. Lauer. 10 cts. W. P. Simmons. Remarkable for its dwarf stature and its brilliant and abundant bloom; extremely bright orange-scarlet; of grand size. 10 cts.

New Zonale Geraniums offered in supplement for 1894, page 6; price 10 cts. each, \$1 per dox.

NEW DOUBLE GERANIUMS.

Beatrice Kelway. Salmon, lighted up with white; perfect in habit; a grand truss. 10 cts.

*Colossus. Flowers semi-double; norets 21/4 inches in diameter; very beautiful, rich shade of rosy crimson; one of the largest and finest double reds. 25 cts.

∕*Double Guinea. Bright orange-yellow; florets and trusses large, finely formed; a good grower, and stands our hot sun well; a grand flower. 25 cts. Fleur de Neige. Semi-double, of the

purest white; vigorous, compact grower;

tine form, excellent. 25 cts.

Lord Tennyson. Very large, semidouble; fiery salmon; very distinct and

beautiful. 25 cts. Leonard Kelway. Glowing carmine; very bright and attractive, the petals showing a peculiar gloss; a grand addition. 10c. Picotee. White, with salmon-pink base; petals quilled and scalloped; a beautiful

and distinct variety. 25 cts.

Raspail Improved. An exquisite shade of deep scarlet; florets fine form, 21/2 inches in diameter; trusses immense; this is a grand variety among the very finest. 25 cts.

Ville de Poitiers. Rosy scarlet, very clear and bright; trusses very large, composed of enormous florets, nearly 3 inches across, and of beautiful form. 10 cts.

New Double Geraniums offered in Supplement for 1894, page 7: price, 10 cts

NEW IVY-LEAVED GERANIUMS.

General Championet. Pure scarlet; floret of a beautiful rose form, quite circular, of the largest size; the most regularly beautiful of all the reds. 20 cts.

Incomparable (Syn, Remarkable). Trusses very large, florets immense and very regular in form; quite full; the color is an exquisite shade of rosy carmine. 20 c. Beauty of Castle Hill 4 mine. tiful variety, producing flowers of a lovely, soft shade of rose, with dark blotch on the upper petals. 20 cts.

NEW IVY-LEAVED GERANIUM.

Rare Water Lilies.

HARDY VARIETIES.

Nymphæa alba candidissima. A large flower of the purest white. 50 cts. to \$1. N. alba. The English Water Lily. Flow-

ers pure white. 50 to 75 cts.

N. flava. Golden yellow; fragrant. 25c.
N. Lodekera rosea. New. Flowers delicate pink. \$2.50.

N. Marliacea chromatella. A rich yellow; fragrant; a beautiful variety. 75c.
N. Marliacea albida. A fine, broad flower, with broad petals of a dazzling white; different from other whites. \$1.50.

N. Marliacea carnea. Similar to the preceding variety in habit; magnificent flow-

ers of a flesh tint. \$2.

N. Marliacea rosea. Similar to N. carnea, but deeper color, being a soft rose of exquisite tint. \$2.

N. odorata Carolinensis. \$1.50. N. odorata exquisita. Large; rosy carmine; very fragrant. \$1.50.

N. odorata. Our native white Water

Lily; noted for fragrance and beauty. 25 cts.

N. odorata minor. A small variety; rosy pink on outer petals. 30 cts.
N. odorata rosea. This is the pink Cape

Cod Water Lily. 50 to 75 cts.

N. odorata sulphurea. Large; canary yellow; fragrant flowers. \$1.
N. odorata superba. A variety with

larger flowers. \$1.

N. pigmæa Helviola. Another small variety, with yellow flowers. \$1.

Nelumbium luteum. American Lotus. A rich sulphur-yellow. 50 cts.

N. speciosum. Lotus of the Nile. Flowers beautiful rosy pink. 50 cts. to \$1. Fo fuller description, see Plant Catalogue (6).

TENDER VARIETIES.

Nymphæa cœrulea. Lavenderblue. 50 cts. to \$1.

N. Devoniensis. One of the rarest, as well as one of the most beautiful Water Lilies; color deep, rosy red. \$1.

N. dentata. Flowers white, 8 to 10 inches in diameter; a very fine species; strong roots. 50 cts. to \$1.

N. gigantea. A very handsome

species; one of the very best in cultivation, producing large flowers of a purplish blue, with immense petals.

N. gracilis. A Mexican species; flowers white. \$1.50.

Large and beautiful N. Lotus. white flowers. 50 cts.

N. Mexicana. The flowers are rich, golden yellow, 5 inches in diam-

eter. 50 cts. N. rubra. Color brilliant crimson; a free bloomer; a magnificent Water Lily. \$1.

*N. scutifolia. Flowers large; petals white at base; sweet-scented. 50 cts. to \$1.

N. Sturtevanti. A beautiful rosy

red. \$4.
N. Zanzibarensis. Deep shade of blue, almost purple; 10 to 12 in-

ches in diameter. \$1 to \$2. *N. Zanzibarensis azurea. Similar to

Zanzibarensis; of a lighter shade. 50 cts.

*N. Zanzibarensis rosea. Flowers rosy pink; in every other respect similar to Zanzibarensis. 50 cts to \$1.

Seedlings of those marked *, can be supplied in May, at 25 cts. each.

NELUMBIUM SPECIOSUM.

New Dahlias.

NEW SINGLE DAHLIAS.

SHOW and FANCY FLOWERS.

Alice Emily. Yellow, shaded buff; extra.

Comte de la Saux. Deep lilac, stfiped dark crimson; dwarf; showy.

Ernest. Dark maroon, sometimes shaded. Flora Wyatt. Reddish orange, striped.
John Kelway.

La Republique. Flesh; fine shape.

Mme. Heine Furtado. White; exceed-

ing'y fine form.

Mme. Octavie Graindorge. Pure

white; fine form.

Mandarin. Yellow, striped crimson.

Matthew Campbell. Apricot, striped crimson.

Mme. E. Fagret. Mauve, striped purple. Mrs. Alexander Campbell. Pale yel-

List

Mrs. Kelway. White; large, fine form. Mrs. Peter McKenzie. Gold, edged

Muriel. Clear yellow; full size, fine form and constant

Princess Mathilda (Bedder). Dwarf: white; good bedder.

Reine Hortense. Gold, tipped scarlet. Reporter. A rich maroon; beautifully formed.

Souvenir. White, edged scarlet. Yellow, flesh and white.

Price, 20 cts. each, \$2 per doz.; my selection, \$1.50 per doz.

NEW POMPON DAHLIAS.

Brilliant. Deep crimson; fine.
Ethel. White, tipped purple.
Fascination. Pink, tipped white. G. Brinckmann. Pure white; fine. Glowworm. Yellow, tipped cinnabar. Henry Kelway. Maroon-crimson. Infancy. Pretty white.

Jesse McMillan. Yellow, suffused with

orange and pink. Little Wag. Lilac, heavily edged with purple.

Louise Rousies. Pure white; charming.
Mignou. Crimson-scarlet.
Nymph. Yellow. tipped red.

Rougier Chauviere. A distinct pompon variety; rich, golden yellow, shaded carmine.

White Aster. Pure white. Price, 20 cts. each, \$2 per doz.; my selection, \$1.50 per doz.

NEW CACTUS DAHLIAS.

Black Knight. Deep maroon. Glory of Swanley. Bright scarlet, shaded lighter; dwarf and free.

James Kelway. Single. Singe white,

edged with purple-lake; very frequently plain purple.

Lilian Avery. White, edged yellow. Maid of Kent. Red, white tips. Pride of Swanley. White, edged with

filac-red.

Parrot. Intense orange-scarlet. Sir Trevor Lawrence. Cherry scarlet, shaded purple.

Price, 20 cts. each, \$2 per doz.; my selection, \$1.50 per doz.

New Gantanas.

A. Claveau. Dwarf, and of spreading habit, covered with flowers of silvery rose, ith center of soft yellow.

Amiel. Semi-dwarf, very compact; color

La Pactole. Dwarf; a mass of golden with center of soft yellow.

reddish orange, with yellow center.

F. Givandeau. Dwarf; very free; center pink and orange, bordered bright rose.

yellow bloom; splendid for bedding.

Price, 15 cts. dach, \$1 per doz.

Chrysanthemums.

A Selection of the Best of Recent Introduction.

COLLECTION OF CHRYSANTHEMUMS.

Ami Hoste. Very large flower of deep yellow, with crimson shadings; very early.

Amoor. Amber bronze, large.

Beau Ideal. A bright, rosy pink, without touch of lavender shadings. We know of no variety that will compare with it in purity and brightness of tone, while in size and general make-up it is as good as the best.

Challenge. A perfect globe of brightest gold, depth and width being equal.

Chas. Davis. A sport from Vivian Morel, which it resembles in all save color, which is a terra cotta or old-rose, shading to clear yellow at the center.

Clinton Chalfant. A bright yellow sport from Jos. H. White, which it resembles.

Enfant des Deux Mondes. The white The color is sport from Louis Boehmer. creamy white, shading to pure white; it is very heavily plumed; fine for cut blooms or for exhibition.

Eugene Dailledouze. A grand yellow large, full, double, glowing in color, stiff stem and good foliage, and above all, a free, easy grower; it is full to the last degree, of great depth and perfect in form.

Eda Prass. A fine, recurving flower of great substance and depth; white, shaded

blush; fine for exhibition.

Ermenilda. Outer petals reflexing, with a high incurved center; color a soft, pleasing shade of pure rose-pink, without shad-

H. L. Sunderbruch. Bright golden yellow, of Japanese incurving form; excellent.

Inter Ocean. A delightful glistening, pearly white, with light suffusion of pink; petals of great substance, recurving, forming a flower one-third larger than the usua Vivian Morel.

Cady Playfair.

Lillian Russell. A beautiful, broad petaled, clear, silvery pink, incurving and forming an immense round ball of largest

size; an early-flowering variety.

Major Bonnaffon. Soft, clear, incurving yellow, full in the center; 6 to 7 inches in diameter, and nearly as deep; in perfect form and finish, like Ivory at its best; habit dwarf; keeping qualities excellent.

Mutual Friend. A reflexed, pure white, from 7 to 11 inches in diameter; great depth.

Mrs. E. G. Hill. Clear pearl pink; very early; 7 to 8 inches in diameter, 3 to 4 inches deep; full to the center; a grand incurving sphere when fully developed.

Mrs. T. H. Spaulding. Mrs. I. Forsterman. A magnificent, extra-large, snowy white variety of the Japanese incurved type.

Mrs. J. George Ils. A grand white, of remarkable substance, size and depth of flower; petals incurved; a perfect sphere.

Mrs. Phipps.

Mrs. Cliffs. (Pink Pearl.) A very beautiful pink.

Mrs. Potter Palmer. Large, full, fine, globular form; rosy pink, reverse silver; vigorous. 50 cts. Ready in May.

Minerva. Clear vellow.

Miss Florence Pullman. Of medium height, with stout stem; flowers enormously large, high built; broad, pure white petals.

Marie Louise. A beautiful, recurving white. with slender, interlacing petals, forming a plumy globe. Plenty of room for this graceful variety, which is a model for cutflowers

Pitcher & Manda. Reflexed Japanese; not deep, but solid and of large diameter; the outer five or six rows are creamy white, and of dahlia-like form; the center is bright vellow, the two colors being sharply defined; one of the most distinct novelties.

Portia. Pink.

Philadelphia. Large pink; fine, globular; 6 inches in diameter; the finest new flower of the season; creamy white, tips tinged primrose—a tone of color difficult to describe. Ready in May. 50 cts.

Rider Haggard. Immense size; deep

Triomphe de St. Laurent. A glorious rich yellow.

Yellow Queen. The finest yellow in cultivation.

Price, 25 cts. each, \$2 per dozen; my selection, 20 cts. each, \$1.50 per doz., save where priced

List

New Beliotropes.

Teameleon. Bright blue, passing to pale lavender; large florets. 10 cts.

Comtesse de Mortemarte. Very free and exceedingly sweet; dark velvety blue, with white eye. 10 cts.

Fleur de Neige. Individual florets very.

Fleur de Neige. Individual florets very large; truss of medium size; a fine, erect grower; very light; one of the best for cutting. To cts.

Mme. de Bussy. Very dwarf; trusses large; flowers bright blue, with white eye; an elegant new sorts 20 cts.

Mme. Ad. Dubouche. Trusses enor-

myus, soft and mossy looking; velvety violet; one of the most beautiful. 10 cts.

Mme. A. Carriere. A very large, white eye, contrasting with the bright blue; panicles very large. 10 cts.

Mireille. Floret is immense; very delicate pearl shade, edged with palest heliotrope. 10 cts.

Picciola. Rosyviolet, with white center; a grand giant variety; also, very free. 10 c.

The Giant. Trusses enormous; violetrose with white eye; one of the best. 10 c.

White Lady. One of the very finest of whites. 10 cts.

New Garnations.

Bouton d'Order. A beautiful yellow, penciled with dark carmine; fine form; vigorous grower.

Eulalia. Light yellow, handsomely penciled with light pink; petals deeply fringed. 25 cts.

Eldorado. A yellow, of free-blooming habit; strong, vigorous plant, erect stems, finely formed flowers; petals edged with

a narrow band of light pink, almost a Picotee in marking.

Helen Keller. Delicate tracing of scarlet on pure white petals; renders it very showy.

Kitty Clover. A prolific, continuous bloomer; light yellow, striped lightly with red and white; finely formed, perfect-fringed flowers. 25 cts.

Laurence Thompson. A dark pink; very pleasing; habit strong; blooms early and continues, with long, stiff stems. 25 cts.

stiff stems. 25 cts.

Ophelia. Large; pink color. Winner of cup at Philadelphia. 25 cts.

Peach Blow. Bright pink, tipped with white.

The Stuart. Brilliant scarlet; very

fine variety.

Uncle John. This variety promises well; habit of plant good and strong; flowers large, on good stems.

Price, 20 cts. each, \$2 per doz., save where priced. Carnations offered in 1894, 15 cts. each, \$1.50 per doz.

Beckwith Gem. Comte de Rousemont. Calband. Emperor d'Maroc. Flamme.

Flamme. Le Reveille.

Miriam Rothschild.

Mrs. F. Sanders. One of the most beautiful that has appeared for years. 25 cts.

25 cts.
Mile. Rosa Roose.
Mon. Sallia.
Mme. Lecuyot.
Petit Robert.
Souv. de Guernsey.

The issonne.

Price, 10 cts. each, 75 cts. per doz., save where priced.

NEW CARNATION.

New Begonias.

REX VARIETIES.

Adolph Pollock. Leaves gray metallic color, spotted around edge with olive-gray. 20 cts.

A. G. Sheppard. 20 cts.

Duc de Brabant. A grand variety; leaves with dark center and light green edges, borne on hairy stems. 20 cts.

Inimitable. 20 cts.

John Chambers. 20 cts. Kaiser William. 20 cts.

Louis Capet. Silvery gray, with broad, olive-green ribs. 20 cts.

Llewellyn. 20 cts.

Merveille. Leaves of medium size; emerald-green, darkened with a glow of red, brightened with regular and well-defined variegations of beautiful silvery gray. 20c.

Mrs. Merche. 20 cts. Quadricolor. 20 cts. Queen Hanover. 20 cts. Walter Lamb. 20 cts.

FLOWERING BEGONIAS.

Ducharte. Incana. La Neige. Flowers pure white. Marguerite. Foliage bronze-green; very handsome.

TUBEROUS-ROOTED BEGONIAS.

The finest strain of Tuberous Begonias.

Single Crimson, Orange, Scarlet, Pink. \$1.50 per doz., \$10 per 100.

Mixed Single. 10 cts. each, \$1 per doz., \$8 per 100.

Double Mixed. 30 cts. each, \$3 per doz.

Grozy's New French Cannas.

Alphonse Bouvier. Leaves green; very strong, tall spikes; rich, scarlet-vermilion flower. 20 cts. each, \$1 per doz.

Baron de Sandrans. A very distinct,

Baron de Sandrans. A very distinct, light yellow, with cinnamon brown spots; flowers very large, with broad, well-rounded petals; foliage a rich green 25 cts.

Camille Bernardin. A strong-growing variety, attaining a height of 5 to 6 feet, producing very large, salmon-colored flowers,

with broad, shell-like petals; foliage green. 25 cts.

Capitaine P. de Suzzoni. One of the very finest spotted varieties; the ground color is of a rich, canary yellow, while the entire flower is spotted with cinnamon-red; foliage light green: 4 feet. 20 cts.

foliage light green; 4 feet. 20 cts.

Charles Henderson. Growth compact and uniform, rarely exceeding 3½ feet in height, which makes it a most desirable companion to Madame Crozy; frequently

exceeds it in size of bloom. 20 cts.

Charles Moore. A very free-flowering variety, with medium-sized flowers
of a bright yellow, so closely covered
with large, deep orange spots as to give
the entire flower the appearance of being
a solid orange when seen from a short
distance; foliage green; 21/2 feet, 25 cts.

distance; foliage green; 3½ feet. 25 cts. Comte de Ganay. Flowers large, of a deep salmon, edged with vellow; the reverse of the petals is almost entirely yellow; this gives the trusses a peculiarly mottled appearance; foliage green; 3 feet. 25 cts.

Commandant Faurax. Flowers of medium size, of an intense, rich, vermilion, overlaid with orange-scarlet; foliage dark green, with purple veins; 4 feet. 25 cts.

Colonel Dodds. A peculiar shade of rosy salmon; foliage dark green; 3½ feet. 25 cts.

Edward Meigs. A grand acquisition, bearing very large flowers in immense trusses of a rich vermilion-scarlet; a strong, robust grower, with dark green foliage, attaining a height of 3½ feet. 25 cts.

Explorateur Crampbel. Foliage green; flower is as large as Bouvier; color clear vermilion-scarlet, tinted with minute blood-crimson spots; flower spikes large. 20 cts.

CROZY'S FRENCH CANNA.

Grozy's New French Gannas, continued.

Florence Vaughan. Flowers in style of Madame Crozy, and more rounded at the ends, are well opened and of the most brilliant golden yellow, dotted with brightest scarlet, and are the largest of all Cannas. 25 cts.

F. Neuvessel. Flowers of good size, of a bright orange-scarlet; very distinct, dark green foliage, with bronzy purple veins and edges; 4 feet. 25 cts.

Germania. Belongs to the Madame Crozy type; very large, bright red flowers, faintly margined with gold, and having a yellow throat. 50 cts.

George W. Childs. Florets are nearest like those of Madame Crozy, but with more yellow on the throat and at the back of flower; the flower-spikes are 5 inches in diameter. 20 cts.

Kænigin Charlotte. Madame Crozy type; broad band of gold, and fine, large, broad petals. 75 cts.

broad petals. 75 cts.

Kaiser William. The flowers are not as large as the best new French varieties, but are still of very good size and shape, of a brilliant red color, and borne on stout, erect stems, well above the foliage. 25 cts.

erect stems, well above the foliage. 25 cts.

L. E. Bally. Flowers of immense size, of a light canary yellow, spotted with orange; petals heavy and broad; foliage green; plant a strong symmetrical grower; very desirable; 3½ feet. 25 cts.

Otto Froebel. On the style of Madame

Otto Froebel. On the style of Madame Crozy, but with a wider edge of golden yellow; a remarkably free-flowering variety. 25c Secretary Stewart. Foliage green;

flower bright garnet. 20 cts.

Ventura. For description, see Catalogue 6. 25 cts.

For other New Cannas, see Catalogue 6.

New and Rare Ferns.

Adiantum intermedium. 25 cts. A. concinnum variegatum. A new variegated variety of A. cuneatum, having the same free growth and graceful habit as that popular and well-known variety; the beautiful green and white variegation of the foliage gives the plant a unique and charming appearance. 50 cts.

Adiantum rhomboideum. 50 cts. A. Mundulum. Pretty, compact habit. 30 cts. A. O'Brienii. 30 cts.

A. elegans. 25 cts. Aspidium amabilis. 25 cts. A. tenuis. 25 cts. Davallia pertaphyla. 25 cts.

ROSE BELLE SIEBRECHT.

New Roses.

PEDIGREE ROSE BELLE SIEBRECHT. (Hybrid Tea.)

A truly superb Rose, the result of a cross between La France and Lady Fitzwilliam; color imperial pink. Mr. Schuyler F. Matthews, the great authority on colors in America, pronounces it a solid pink of the riches shade, a rare color. The flowers, which are sweetly perfumed, are large, beautifully formed and of that long, apering shape with high

center, and when half bloom the petals reflect in a graceful manner. The buds (which are borne on strong erect stems 1½ to 2 feet long), are 2½ to 3 inches in length, and when fully blown the flowers are 5½ to 6 inches in diameter without showing the center. The flowers have great substance; the petals, which are of a heavy texture, do not easily bruise or tarnish; they are good lasters, some having been kept for seven days without falling. It is a free and vigorous grower, with large and glossy foliage of leathery texture, entirely free from mildew. A most prolific bloomer, every growth producing a perfect flower, not a deformed flower or bullhead ever having been seen. It is predicted by eminent Rose, growers that it will be the best selling and the best paying Rose that has ever been introduced. We do not this Rose out to be tried, as we have subjected it to the severest tests for over two years, and we can recommend it as a first-class acquisition. It has received the gold medal of the National Rose Society of Great Britain, and first-class certificates from all the leading horticultural societies in Europe and America. It has aslo proved itself to be perfectly hardy out of doors in this country, and a free and thorough Everbloomer. It should be stated that this Rose is quite distinct from the popular varieties which are grown for cut flowers. It excells them all in color, form and freedom of blooming, and develops and holds its color perfectly in dull weather. Dean Hole, of England, the acknowledged greatest Rosarian and the author of the Book on Roses, says: "It is not only the fine form and beautiful color which all must admire, but also the vigorous habit and endurance of the flowers, all of which will make it to be universally welcomed." Price from 3½ inch pots, \$t each.

*NEW ROSE CRIMSON RAMBLER.

"C. Turner showed Roses to perfection; the center of attraction was the bank of Crimson Ramblers, every shoot smothered with crimson flowers." The behavior of this plant has been highly satisfactory. In some gardens the shoots have grown to feet in length and they have been sheaves of bright crimson flowers for the past month or more. It is a Rose for the million. 25 cts. each.

Lord Penzance's New Hybrid Sweetbriars.

These lovely hybrids, apart from their extreme beauty, are most interesting, being crosses between the common sweetbriar and various other Roses, such as Austrian Briar varieties of Gallica, etc. Like their parent, the common Sweetbriar, the foliage is deliciously scented. The flowers are of the most beautiful tints, and produced in great profusion Not the least of their recommendations is the fact that they are **perfectly hardy**, even in the coldest situations, and possesses a robust vigor which is quite astonishing, bushes four or five years old throwing up shoots of 10, 12, and even 15 feet high; these, when covered with flowers of the most delicate shades, have a most gorgeous effect.

*Amy Robsart. Lovely deep rose: the buds before opening are most graceful; of true Sweetbriar type; and abundant bloomer: robust and free.

er; robust and free.

*Anne of Gierstein. Dark crimson, followed by an abundance of pretty clustered bunches of hips; large foliage, good grower and graceful branching habit.

*Brenda. Maiden's blush or peach; dainty in color and shade, the contrast and effect of the bright golden anthers add peculiar charm to this variety.

peculiar charm to this variety.

*Flora McIvor. Pure white, blushed with rose; perfect for cutting large flowers, their elegance being increasee by the sprays of tender foliage that pass up between them; graceful in growth and habit.

*Lady Penzance. Beautiful soft tint of copper, with a peculiar metallic luster: the base of each petal is a bright yellow, which, showing through the clear golden anthers, forms a halo round them and, gives the

whole flower and plant a delightful effect very free-flowering, with a delicious perfume from foliage and flower; a wondeful grower shoots pendulous.

*Lord Penzance. Soft shade of fawn or ecru, passing to a lovely emerald yellow in the center, sometimes toned with a most delicate pink, a good grower and abundant bloomer; very sweet scented; this variety is a seedling from Sweetbriar x Harrisoni.

*Lucy Ashton. Pretty white blooms with pink edges: not so large as some others; wonderfully free-flowering: free grower, with rather erect shoots; foliage as sweet as the old Sweetbriar.

*Meg Merrilies. Gorgeous crimson: very free-flowering; seeds abundantly; has a wonderfully robust habit; large foliage very fine.

*Rose Bradwardine. Beautiful clea: rose, perfect in shape: very profuse, strong robust habit.

Price, 75 cts, each; the set of 9 for \$6. Ready in April.

Hints on the Treatment of the New Sweetbriar Hybrids.

These are strong, vigorous growers, and plenty of room should be given them so that the branches of one tree are not likely to cross and spoil the effect of those of another. They are indoubtedly seen to best advantage planted out singly on a lawn, with a few yords of green sward between them. In this position the long, graceful branches have a splendid effect.

On no account should they be pruned at any time, beyond removing any branches which may be undesirable to keep. If pruned like ordinary Roses, they produce little or no blossom.

Each tree should have a stout stake 4 to 6 feet long, and to this a few of the leading branches may be tied to prevent the plant being blown over by the wind, but the branches look best if allowed to hang gracefully and naturally.

NEW ROSES.

American Belle. A deep clear pink; a sport from American Beauty, equally fragrant.

Antoine Gaunet. "A strong but dwarf grower, with beautiful foliage. Flower very large; salmon shading to rose."

*Alister Stella Grey. Raised by A. H. Gray, of Bath, the celebrated Rosarian. "It flowers in clusters like a Noisette, and flowers early and late-well into November; similar to W. A. Richardson; I have known it make growths of 15 to 18 feet in one season." \$1 each.

Beaute Inconstant. Tea. A charming rose, of the most variable coloring; especially beautiful in the bud state, when the color is orange-scarlet

Baronne Berge (T). Beautiful light rose, shaded with lemon, yellow center.

Climbing La France. Similar to La France and of climbing habit.

Chas. Gater.

"A strong Director R. Gerard. grower; flower large and double; color, canary-yellow, shading to flesh, and bordered on the edges with china-rose.

Elise Fugier (T). Pure white shaded with yellow in the center, outer petals washed with rose in the way of Nephetos.

Empress Augusta Victoria. (See description Catalogue, 1892.)

Fota Morgana.

Grandiflora. 30 cts.

Lady H. Grosvener. (See description

Catalogue, 1892.) Leo 13th (T). White shaded with straw, center ochre, large fine petals, buds like

La France Climbing. Identical in all with the La France, except its climbing

Le Soel. Rich glossy yellow, fine thick

petals, a first-rate new Rose.

Leonie Osterrieth. Porcelain white, with deeper center; a very meritorious Rose.

Madeline Guillaumez. Fine regular form; color a delicate creamy white; with salmon shaded center.

Mme. Pelissier. !

Mrs. Harness.

Marchioness of Londonderry. A magnificent rose; white, blush center, vigorous and free-bloomer; one of the finest new Roses. 50 cts.

Mrs. Whitney. This fine new Hybrid Tea is clear deep pink, very fragrant; flowers large, coming with long buds; very free in flower.

Maman Cochet. In the general style of C. Mermet, with stronger growth; the color is that of a very bright Mermet, with shadings of yellow; flowers very large and double.

Paul Marot. Flower large and double; pure china red in color; bud long and beautifully formed.

Setigera. A species similar in growth to

the Scotch Roses; flowers yellow. 30 cts. **Sweetbriar.** (Eglantine.) 20 cts.

Price 25 cts. each, \$2.50 per dozen, save where priced.

OLD GARDEN ROSES.

Austrian Copper. A charming and unique shade of rich coppery crimson, with golden bronze shadings, indescribably beautiful, single. 30 cts.

Austrian Yellow. Flowers single, of the richest and purest yellow without a trace of other color; deep yellow stamens. We have many beautiful yellow Roses, but none of the rich collor of this charming flower. 30 cts.

Cabbage or Provence Rose. Rose pink, large and double, very sweet; a lovely old garden Rose. 25 cts.

Damask Rose. Pink, double, very free 25 cts.

Old Pink China (or Pink Daily). A beautiful but neglected old Rose that blooms from early in the season up to winter; color bright rose or pink, deliciously sweet and quite hardy. 25 cts.

Lady Washington. An old Rose found growing at Mount Vernon; color blush white, belonging to the Tea-Noisette class. 25 cts.

Rosa Sulphurea. (Double yellow Provence.) Flowers large, very double, rich bright yellow; the finest of all double yellow Roses; hardy. 50 cts.

River's Musk. This old variety has a peculiar fragrance; small, white and pink flowers in clusters.

Rosa Wichuraiana. A Japanese species of trailing habit; its stems creeping on the ground as close as ivy. Foliage small glossy green; a profuse bloomer; flowers pure white, single; very hardy. 20 cts. each, \$1.50 per doz., \$10 per 100.

Williams' Double Yellow Sweetbriars. Double yellow in the way of Harrisonii; a fine yellow Rose. 25 cls.

York and Lancaster. Bright Rose, striped purple and white. 25 cts.
